Creating summary tables for conditions

C1_corr_dir: direction of correlations between LDM and m_RT is similar at the both samples A and B

C0_bAB: sign of estimate for LDM in regression model for m_RT is similar at the both samples A and B: direction of correlations between LDM and m_RT is similar at the both samples A and B

C2_B_inCI: Correlation between LDM and m_RT on sample B is in C.I. obtained from sample A

C3_AB_pvalue: p-values for estimate for LDM in regression model for m_RT are less than 0.05 on the both samples

C1C2C3: C1_corr_dir AND C2_B_inCI AND C3_AB_pvalue

C4_dBIC_AB: decrease of BIC in comparison LDM regression model and baseline is more than 3 for at the both samples

C1C2C3C4: C1_corr_dir AND C2_B_inCI AND C3_AB_pvalue AND C4_dBIC_AB
